Detailed Breakdown of Deliverables

What's Included?

- ✓ Dedicated project manager
- ✓ All deliverables as specified
- ✓ 30 days post-delivery support
- ✓ Data security and confidentiality compliance

1. Survey Construction

Scope: Questionnaire design and finalization

- Initial consultation and needs assessment
- Research/Project design
- Survey instrument development and design
- Final survey construction, coding, and programming

2. Sampling

Scope: Sampling methodology and sampling frame development

- Sampling method selection/construction
 - Sampling frame construction
 - Target population analysis
 - Sample size calculations and power analysis
 - Recruitment strategy development (if needed)
 - Quality assurance protocols
-

3. Data Collection

Scope: Survey administration

- Selection of data collection mode (online, phone, mail, in-person as applicable)
 - Field management and monitoring (as needed)
 - Quality control during data collection
 - Data security and compliance protocols
-

4. Data Cleaning

Scope: Data validation, cleaning, and preparation for analysis

- Data quality assessment
 - Missing data analysis and data treatment
 - Outlier detection and handling
 - Variable coding/re-coding and transformation
-

5. Data Analysis

Scope: Statistical analysis and interpretation

- Descriptive statistics and data profiling
 - Statistical significance testing
 - Results interpretation and insights
-

6. Reporting

Scope: Essential reporting with visualizations

- Detailed findings report with visualizations
-

7. Support Webinar

Scope: Client training and results presentation

- Results presentation webinar (1 hour)
 - Follow-up support session
 - Webinar recording and materials
-

Project Timeline

Estimated Duration: 12-16 weeks from project initiation

- Survey Construction: 3-4 weeks
 - Sampling & Setup: 2 weeks
 - Data Collection: 4-6 weeks
 - Data Processing & Analysis: 2-3 weeks
 - Reporting & Webinar: 1-2 weeks
-

Additional Considerations

Costs can vary based on the following items...

- Sample size requirements
- Survey complexity and length
- Number of languages required

- Specialized population targeting
- Rush timeline requirements
- Additional analysis request
